PumpTech

Your petroleum equipment partner

About the company

PumpTech Limited is a privately owned company in East Africa. It is a premium source of petroleum equipment and related services, including retail fuel station and terminal automation, general oil and gas equipment maintenance, sludge management and disposal, corrosion control, and so on, making us fluid handling experts for the process industry.

We intend to maintain that position by working fluidly, and ceaselessly, to bring you the best of service. PumpTech is a solution provider to both the marketer, dealer, and technician, by bringing technology to the pump and marrying the skills to automation in Oil and Gas sector. Today, PumpTech is a leading distributor of Wayne Fueling Systems, Diamond Key International, and Total Control Systems. Gradually, the company's profile has incorporated our expertise to cover a wider scope in both retail and commercial fuel systems space.

Inspire by the technological advancement in the oil and gas sector, PumpTech leads in provision of durable equipment and related services. Giving service to small, medium and big scale companies both in international and local market, PumpTech has the capability and background to meet our customers' needs.

Value System

Expertise

PumpTech excels as fluid handling experts, offering top-notch petroleum equipment and services backed by extensive knowledge and experience in the industry.

Technological Innovation

PumpTech embraces advanced technology, integrating automation and skilled technicians to deliver efficient fuel station and terminal automation solutions.

Service Excellence

PumpTech prioritizes exceptional customer support, providing prompt and reliable solutions tailored to the needs of marketers, dealers, and technicians.

Customer Satisfaction

PumpTech focuses on meeting customer needs, offering durable equipment and services to companies of all sizes, both locally and internationally.

Retail Pumps and Dispensers

Wayne Helix™ Fuel Dispensers

Helix™ 1000

The Helix™ 1000 is ideal for customers looking for practical features, accuracy and dependability.

Helix™ 2000

The Helix™ 2000 fuel dispenser's unobtrusive size makes it the ideal solution for truck stops, special applications like marinas and airports, and confined sites, such as small retail fuel stations.

Helix™ 6000

The Helix™ 6000 dispenser delivers up to five products, including alternative fuels, in a scalable framework, optimizing the dispenser's size and layout.

Helix™ 4000

The Helix™ 4000 dispenser offers increased capability with multiple configurations, fuel blending, variable flow rates and improved payment options. The dispenser has the ability to dispense two fuel grades.

Helix™ 5000

The Helix™ 5000 fuel dispenser is a versatile, durable workhorse for your forecourt. The modular payment system allows retailers to adapt to consumer needs, so that new payment capabilities can be added at any time.

Designed and engineered on a single global platform, Wayne Helix™ dispensers emphasize intelligent design, advanced technology, safety and security.

Helix™ dispensers meet IEC and UL safety standards while addressing a wide variety of security concerns. From payment transactions to secure internal dispenser components, the design of the dispensers helps deter and detect product tampering and fuel theft.

Helix™ fuel dispensers incorporate global components, innovative metering, durable materials, and advanced technology to promote a superior fueling experience now and for the future.

Wayne Global Century Dispensers

Global Century

The Global Century fuel dispenser has the option to deliver up to two products, including clean fuels, and delivers flow rates of up to 130 liters per minute. Its attractive design, which is available in both island or forecourt orientation, provides a clean look well-suited to any forecourt environment.

Functionality

The dispenser uses the proven and dependable Wayne iMeter fuel meter and Wayne iGEM computer.

Low-cost maintenance

The dispenser gives you the freedom to order the exact specification to suit your business needs.

Customer-centric

The clean, modern design has integrated easy-to-read LCD displays and large product identifiers.

Wayne Global Vista Dispensers

The Global Vista fuel dispenser has the power to provide up to four products across eight nozzles, and boasts standard flow rates of 50 liters, with the option to upgrade to a maximum of 75 liters per minute. This dispenser uses less island space due to its orientation, and is available as a suction pump or remote dispenser to suit your forecourt needs.

Reliability

dispenser is ideal for those requiring a high level of performance and dependability.

User-friendly experience

The dispenser has been built following careful analysis of consumer behavior, with an intuitive interface, easy-to-read displays and a vibration-free, low noise operation.

Productivity

This dispenser built on corrosion-resistant materials and global standard components to improve productivity, lower maintenance expenses.

Advanced and Reliable Fuel Dispensers

With the Tokheim Quantum® fuel dispensers, every detail is taken into consideration to minimize site downtime and installation costs, making the process (and cost) of change as streamlined as possible. Engineered with field-proven global components and corrosion resistant materials, the new EMEA Dover Fueling Solutions® (DFS) dispenser ranges offer exceptional reliability, enhanced modularity, advanced hydraulics, and minimal meter drift. Retailers looking to upgrade can rest assured they are investing in a dispenser built to last.

Quantum® 230

The Quantum 230 fuel dispenser is able to deliver two fuel types at speeds of up to 110 litres per minute (high-speed model), whilst its clean and simple hose management system ensures a tidy forecourt.

Quantum® 330

This 'H-type' dispenser is island orientated and has a simple effective hanging hose system for ease of use and meets the varying regional market requirements.

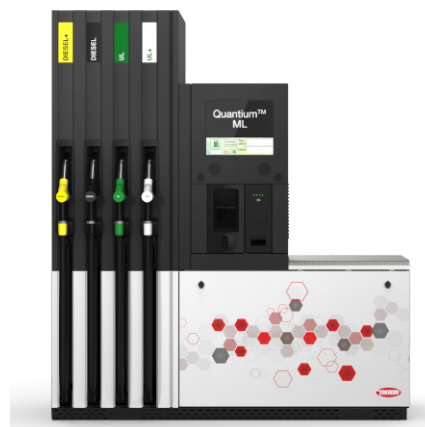

Quantum® 430

This is a wide body dispenser range designed to handle a variety of fuel types. This model is available with optional vapour recovery, a choice of up to 8 nozzle and hose combinations delivering four products.

Quantum® FS

The Tokheim Quantum FS fuel dispenser is compact yet versatile and exceptionally powerful, offering an extensive array of configuration options. They are engineered for longevity, requiring minimal maintenance for reliability and cost effectiveness.

Quantum® ML

Presenting the Tokheim Quantum ML fuel dispenser, a modern take on the highly acclaimed Tokheim Quantum 510M model. The Quantum ML is modular, versatile, durable, and highly configurable. It features enhanced nozzle availability and can dispense up to five fuel grades per side, with an extensive range of options to meet specific needs, from heavy-duty vehicle refueling to retail fuel services.

Our Products

In Partnership with

Retail Automation

Our retail automation product offering is designed to offer seamless connectivity between your forecourt equipment, as well as facilitate best-in-class fuel monitoring services that help your fuel business lower operational costs and improve fuel margins.

DFS Edge Device

We offer some of the industry's most advanced tank gauging solutions, including the ProGauge MagLink LX 4 and the OPW Fuel Management Systems SiteSentinel family.

Prizma POS

A connected mobility and convenience hub that brings new possibilities to your convenience retail business. Prizma enables you to see your business in a colorful new light and in greater depth

Wayne Fusion Server

The system allows your dispensers, tank gauging system, price signs, and back-end reporting to more seamlessly interface with your point-of-sale (POS) and ERP systems.

Tokheim Petrol Manager

Tokheim Petrol Manager is a fuel management solution that enables remote site or network monitoring. The alert module provides you with an immediate overview of the status of your network and quickly identifies possible problems.

FSC3000

We offer some of the industry's most advanced tank gauging solutions, including the ProGauge MagLink LX 4 and the OPW Fuel Management Systems SiteSentinel family.

Tokheim Homebase

Gaining visibility over unmanned stations from afar is paramount in the effective running of your network. Tokheim Homebase centralizes information from payment systems, dispensers, tank gauges, pole-signs and CCTV equipment.

One Portal

One Portal cloud services platform is an all-in-one cloud platform that provides and integrates the most valuable features from DFS' portfolio of remote management and site optimization products into one single harmonized and efficient web-platform.

Four Things You Need to Know About the EMEA Fuel Dispenser Ranges

1. Unmatched Modularity and Customization

DFS's EMEA dispenser ranges offer over 10,000 possible configurations, allowing retailers to tailor dispensers to specific forecourt layouts and branding needs. Models like the Tokheim Quantum® ML, Wayne Helix® 5000 II, and Wayne Helix® 6000 II feature intelligent modular designs and can integrate T-Media™ digital media for dynamic customer engagement

2. Enhanced User Experience

The new dispenser designs prioritize customer convenience with features such as an improved hose retraction system and electronic dispenser heads. These enhancements ensure easy hose handling and optimal user interaction, contributing to a superior refueling experience.

3. Superior Accuracy and Durability

Equipped with DFS's Piston meter, these dispensers maintain exceptional accuracy with minimal meter drift (0.04% over 8 million liters). The hydraulic stack design and patented double-bump connections facilitate quick maintenance and reduce the risk of leaks, ensuring long-term reliability

4. Robust Security Features

To combat fuel theft and tampering, DFS dispensers incorporate advanced security measures, including multi-level access control, tamper-resistant components, and secure payment terminals designed to prevent card-skimming

Our Products

In Partnership with

Piping System Solutions

We supply pipe fittings and environmental protection equipment from industry leaders like Zeppini. With over four decades of expertise, Zeppini has become a global benchmark in fuel station solutions, trusted in more than 80 countries. Their products meet rigorous international standards, ensuring safety, compliance, and durability. Beyond quality equipment, Zeppini backs every solution with expert technical support, making installation and operation smooth and reliable.

Piping and Transition Fittings

Electrofusion Fittings – Fuel Flex

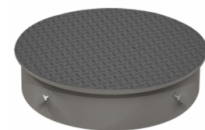

Transition Fittings

Manhole Covers

Our Products

In Partnership with

Measurement and Automation Solutions

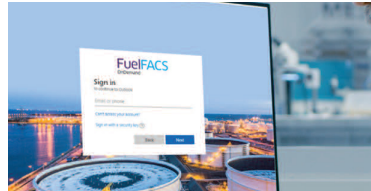

We provide integrated flow measurement and automation solutions, from the wellhead to final point of sale. We deliver accurate and reliable measurement for the transportation, distribution, and storage of energy products by truck, rail, vessel, aviation and pipeline.

Sening® Tank Truck Package

We supply an economical solution for metering hydrocarbon liquids such as fuel oil and gasolines from road tankers.

FuelFACS™

FuelFACS™ automates fuel terminal operations by managing every aspect of product movement for bulk terminals of any size.

Smith Meter® AccuLoad®

Smith Meter® AccuLoad® provides reliable measurement for custody transfer loading and unloading of petroleum liquid products.

Smith Meter® Turbine Meter

This product provides highly accurate measurement required for custody transfer of petroleum liquids such as crude oil and refined products in larger pipelines.

Smith Meter® PD Meter

The PD Meter is ideal for loading rack service and custody transfer of petroleum products like gasoline, ethanol, kerosene, diesel fuel, jet fuels, and fuel oils.

Ultrasonic Meter

This product is ideal for custody transfer measurement of petroleum products. Its multiple paths accurately resolve difficult flow profiles, maintaining linearity and repeatability over the widest range of conditions.

Smith Meter Prime 4

The PRIME 4 is ideal for loading rack service and custody transfer of petroleum products. Applications include gasolines and oxygenates, ethanol, kerosene, diesel fuel, jet fuels, and fuel oils.

210 Digital Control Valve

The Smith Meter Model 210 Valve is typically used in conjunction with either a Smith Meter AccuLoad® or microLoad Preset Controllers for loading and unloading at truck racks, bulk plants or processing installations.

E-Type Strainer

Smith Meter® E Type Steel Strainers are necessary to provide protection for metering systems against dirt and other foreign material.

Air Eliminator

Smith Meter® Model AR Air Eliminator separates and releases air or gas from petroleum or other liquids before they are passed through the meter.

Our Products

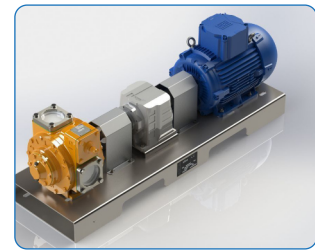

In Partnership with

Liquid Transfer Products

Positive Displacement Rotary Pump

The positive displacement rotary vane pump allows you to suck up the product and, by adjusting the by-pass valve, determine the delivery pressure. This kind of pump is suitable for fuels, adblue, kerosene, solvents, oils and industrial liquids.

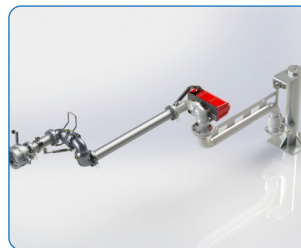

Top Loading Arms

The top loading arm is used to transfer fuels or industrial liquids in tankers and railway tanks through the top manholes. Different types of products can be configured with variable range of action and with flow entry direction from above and below.

Bottom Loading and Unloading Arms

The bottom loading arms are used to load/unload tank trucks and railway tankers for fuels and industrial liquids. This system operates directly on the ground instead of getting on the tank and thus avoids the formation of electrostatic charges generated.

Folding Stairs for Trucks Access

The Silea Liquid Transfer 3700 serie Folding Stair is designed to allow access from the platform to the manholes of tank trucks and rail-wagons. The stairs automatically adjust to the height of the tank and can be designed with 3, 4 or 5 steps, with or without safety cage.

Components

All the pre-assembled components that can be found mounted on our products (swivel joints, ERC valves, API RP 1004 couplers...) belong to this category. Depending on the needs, Silea components can be of different materials and sizes.

Our Products

In Partnership with

Air Inflation and Compression Equipment

PCL's world-renowned range of tyre inflation and compressed air equipment can satisfy any industry need, with bespoke products designed to meet the demands of local markets. The company's dedication to continuous development means customers have access to the most advanced and extensive product portfolio available.

| | | | |
|--|--|---|--|
| | | | |

| <p>50L 2.5HP DD Compressor 8 bar 206 l/min</p> | <p>Hose Fittings</p> | <p>4-in-1 Tyre Valve Tool</p> | |

Tyre Inflation & Air Equipment

Includes manual and automatic tyre inflators, air hoses, couplings, air tools, and accessories designed for professional workshops, forecourts, and mobile service providers.

Forecourt Solutions

Comprehensive equipment for petrol stations and service areas, including digital tyre inflators, water dispensers, vacuum units, AdBlue® systems, and integrated payment technology.

Nitrogen Inflation & Air Treatment Systems

Advanced nitrogen generators and air treatment solutions for improved tyre performance, fuel efficiency, and environmental impact—ideal for automotive, aviation, and industrial sectors.

Our Products

In Partnership with

Liquid Measurement and Recording Equipment

Total Control Systems specializes in providing both reliable and innovative liquid measurement and recording equipment that is Weights and Measures approved (NIST, OIML, NMI, MID, and SABS). Today, Total Control Systems can be found supporting companies both large and small across the globe.

Flow Meters

Accurately measure liquids with TCS piston, rotary, and oval gear meters. With a wide range of sizes and metallurgies, TCS can provide the right meter for your application.

TCS 700 Rotary Meters

TCS 682 Piston Meters

TCS 500 Oval Gear Meter

Accessories

Complete your metering system with these TCS-approved accessories including registers, air and vapor eliminators, pulse transmitters, valves, and more!

Air and Vapor Eliminators

Electronic Registration

Mechanical Registration

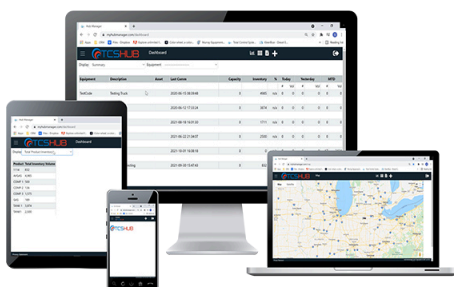

Pulse Transmitters

Valves

TCS Hub

Electronically upload your delivery information to the cloud from the TCS 3000. Manage it in the TCS HUB or import it into your back office software.

Our Products

In Partnership with

Lubricants and Fluids Handling Equipment

Oil Equipment

Eurolube Equipment offers fluid handling systems for industries like automotive, mining, agriculture, and manufacturing.

Hose & cable reels

Eurolube Equipment's hose and cable reels enhance workshop efficiency and safety, handling media like oil, air, and electricity. They feature durable, powder-coated construction and offer flexible mounting options on walls, ceilings, or floors.

Service Garage & Lube Equipment Catalog

We supply equipment to monitor, control, manage and dispense fluids. We offer a full range of high-quality pumps, meters, valves, hose reels and accessories to increase production and reduce waste and downtime.

Bulk oil dispensing systems

Oil transfer pumps

Cord reels

Portable fluid and oil drainers

Dispense guns and oil meters

Retractable oil lights

Grease dispenser valves

Rustproofing and undercoating spray guns & Pumps

Our Products

In Partnership with

Corrosion Prevention & Sealing Products

Whatever your requirements, when it comes to long-term corrosion prevention, we have the solution for you powered by Denso™. For 90 years Denso™ has been a world leader in providing innovative and permanent corrosion prevention solutions over hand tool cleaned steel surfaces whilst reducing applied coating costs and meeting the most stringent health & safety requirements.

From sub-zero environments to extreme high temperatures, our range of products are capable of withstanding the toughest conditions, as well as proving to be cost-effective and maintenance free for several years.

Our Catalog

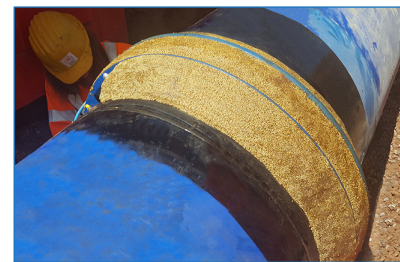

Liquid Epoxy Coating

Protal™ liquid epoxy coatings are a range of high-build, fast cure epoxies designed for a variety of above and below ground corrosion prevention applications.

Petrolatum Tape Systems

Denso™ Petrolatum Tap is versatile, easy to use, surface tolerant and long-lasting, it can be used as an effective solution to a multitude of corrosion prevention problems.

Sealing and Moulding Mastics

Denso™ moulding mastics are self-supporting, cold-applied compounds used to contour irregular profiles, such as flanges and couplings, before the application of petrolatum or bitumen tape wrap.

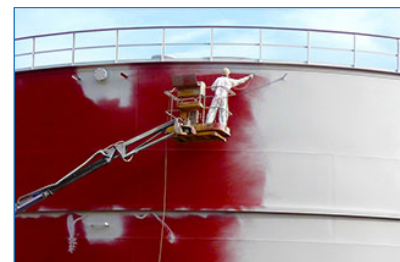

Protective Outerwrap

Protective outerwrap can be applied to encase the primary layer of protection against impact or U.V. Exposure and serve as a barrier between the inner layer and the external environment. Protective outerwraps can be applied to buried, exposed or submerged pipework and piles; tie rods; cables; and service pipework.

Visco-Elastic Products

Viscotaq™ is the ultimate visco-elastic amorphous a-polar polyolefin for the protection against corrosion of underground and aboveground substrates in the pipeline, petrochemical, water industry and more.

Industrial Coating and Linings

Archco™ coatings & linings are designed for protecting steel and concrete tanks, pipes and banded areas that are in contact with highly aggressive liquids and materials. Available in medium and heavy-duty varieties the linings consist of resin containing glass flake or glass cloth reinforcement.

Our Products

In Partnership with

Pump Products

Self priming pumps

GormmanRupp™ self-priming pumps are the world's leading choice for waste handling applications in industries such as steel and paper mills, mining operations, food processing plants, power plants, automotive factories, tanneries, and wineries. They are also the pump of choice in many sewage-handling applications worldwide.

Priming Assisted Pumps

GormmanRupp™'s extensive line of hard-working, dependable priming assisted (dry prime) pumps tackle clear liquids, tough solids, and slurry applications. All of GormmanRupp™'s priming-assisted (dry prime) pumps are designed and engineered for the most rugged and demanding construction applications and are backed by an industry leading two year warranty.

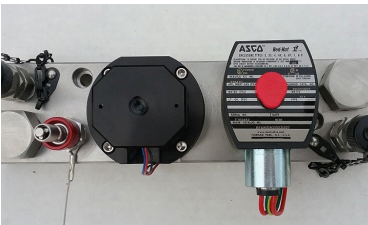

Centrifugal Pumps

We supply a range of efficient centrifugal pumps with few moving parts requiring minimal maintenance and service. These rugged pumps offer years of performance life powered by GormmanRupp™.

Measurement and Control Equipment

Brodie International continues to build on its strong foundation of high-precision measurement and control equipment, adding a vigorous commitment to engineering excellence in an expanded global environment.

Key Benefits for Our Clients

Confidence in Calibration – backed by ISO 17025 accreditation.

Proven Technical Competence – impartial, precise, and reliable results.

Global Acceptance – results recognized across all ILAC member countries.

Reduced Retesting – smoother international trade and cross-border operations.

Regulatory Compliance – supports industry and government requirements.

Operational Efficiency – trusted data that improves performance and safety.

Why Choose us

We are inspired by the technological advancement in the oil and gas industry, PumpTech Limited provides durable equipment and related services.

Giving services to small, medium, and large scale customers both in the local and international markets. We have the capacity to meet our customers' needs.

Ethics and Compliance

PumpTech Limited is committed to realizing our core values in our corporate operations and conduct legal and ethical business, satisfying public expectations. For that reason, our values inform our commitments. We comply with applicable rules and guidelines, meeting the fundamental quality and professional standards.

Our commitments are not limited to compliance but includes how we relate with our employees, customers, and the public.
